

Option 1 - Find your size using a ring

Please read all the instructions, as the measurements may not be accurate if all the steps are not followed correctly.

1. Before printing, make sure page scaling is disabled in the print options dialog.
2. Measure the bar shown on the right and make sure it is exactly 10 cm long.
3. If the measurements are not accurate, check that you are printing the page at full size and print it again before continuing.

Place a ring over the circle that most closely matches its inner diameter. Check several sizes to find the exact match, and remember not to use any scaling when printing so the template measurements are not altered.

Option 2 - Find your size by measuring your finger

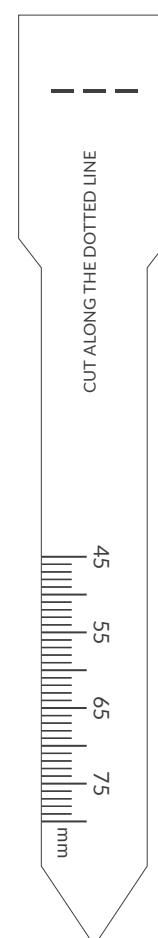

Please read all the instructions, as the measurements may not be accurate if all the steps are not followed correctly.

1. Before printing, make sure page scaling is disabled in the print options dialog.
2. Measure the bar shown below and make sure it is exactly 2 cm long.
3. If the measurements are not accurate, check that you are printing the page at full size and print it again before continuing.

Instructions for using the ring sizer:

1. Cut out the sizer and make a small opening where indicated: "CUT ALONG THE DOTTED LINE".
2. Slide the pointed end through the opening you cut.
3. Place the sizer around the finger where you will wear your new ring and pull the pointed end until the sizer fits comfortably around your finger.
4. The number shown just after the cut slot is the circumference of your finger. Find the equivalent ring size in the table below.
